PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

DANGER

Corrosive. Causes burns and irreversible eye damage. May be fatal if inhaled. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Do not breathe vapor or spray mist during brush, roll, spray or dip application. Wear goggles or face shield, protective clothing and rubber gloves. Wear a NIOSH/MHSA approved mist/vapor respirator when spraying for continued or prolonged use of this product or for frequent use of the product. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. In case of medical questions, emergencies or accidents involving this product, call Chemtrec at 1-800-424-9300. Application of this product may produce a strong, lingering, unpleasant odor.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

Do not use or store near heat or open flame.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

STORAGE: Store in a secure, well-ventilated area protected from extreme temperatures. Do not transfer to unmarked containers. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

GENERAL: Consult Federal, State or local disposal authorities for approved alternative procedures.

WARRANTY:

If you open this container and find that the product does not conform to the specifications on the label or in our catalog, you may return it within twenty days of purchase to American Tar Company (ATCO). ATCO will promptly replace it without charge. This is in lieu of all other warranties, either express, implied, and statutory, and except for this warranty all express, implied, and statutory warranties (including the implied warranties of merchantability and fitness for a particular purpose) are hereby disclaimed. Replacement is your only remedy and ATCO's only liability. ATCO shall not be responsible for any losses of any kind associated with the use

CONCENTRATED WOOD PRESERVATIVE

1423

GREEN

FOR EXTERIOR USE ONLY

Active ingredient:

Copper Naphthenate.....45.40%*

Inert Ingredients.....54.60%

Total.....100.00%

*Equivalent to 5% metallic copper

Woodlast2c weighs approximately 8.75 lbs. per gallon

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Call a physician.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth to mouth. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF SWALLOWED: Drink promptly a large quantity of milk, egg white, gelatin solution, or, if these are not available, large quantities of water. Avoid alcohol. Get medical attention. Do not induce vomiting.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

CONTENT FIVE GALLONS/18.93 LITERS

of this product or any damages of any kind resulting from its use. (Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.) This warranty gives you specific rights, and you may also have other rights which vary from state to state.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use only the application method specified for a particular use. **Woodlast 2c** is a concentrate and requires dilution with water before use. To treat wood for use in moderate decay hazard locations, dilute one volume of **Woodlast 2c** with 4 volumes of water. To treat wood for use in high decay hazard locations, such as ground contact, dilute one volume of **Woodlast2c** with 1.5 volumes of water. It is intended for wood products that usually require painting or stenciling such as millwork and the like or in special situations to treat lumber for long storage in the open or in ground contact by simple non-pressure method. **FOR TREATMENT BY DIP, ROLLER, BRUSH, AND SPRAYING** Above Ground Contact: The best results will be obtained if wood to be treated is immersed for 3 minutes or longer. If dipping is not possible, 2 brush coats, roller, or spray applications should be applied. Allow at least 1 hour between applications. Make certain all areas are fully treated to get the maximum benefits. Allow 24 hours or longer after application of the preservative prior to painting. Ground Contact: Seasoned or green wood may be treated. Make certain the wood is free of bark, then immerse in **Woodlast2c** for 12 to 48 hours or until the sapwood is completely penetrated.

COVERAGE: One gallon covers 100-300 sq. ft. depending upon the wood species, porosity of the wood, and method of application. Water repellants may be admixed with **Woodlast2c** to improve dimensional stability of the treated wood.

RECOMMENDED USES:

Woodlast2c is recommended for millwork. Powder post beetles which invade structural lumber are killed by application of this preservative. These insects will not attack the treated wood. **Woodlast 2c** may also be used on fence posts, poles, foundation sills, decks, and all exterior wood exposed to moisture or weather prior to installation at domestic sites. Pretreatment only. Do Not apply on or near water or wetlands. Since **Woodlast 2c** has very low phytotoxicity it can be used to treat wood for greenhouses, nursery flats, etc. In addition to preventing decay, blue stain, and insect attack on wood, **Woodlast 2c** controls warping, swelling, shrinking and end checking caused by changes in moisture content of lumber and plywood products. Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with **Woodlast 2c**. Wood treated with **Woodlast 2c** should not be used where it may come in contact with food, feed or potable water. See Technical Bulletins for additional uses.

CONTENT FIVE GALLONS/18.93 LITERS

particular purpose) are hereby disclaimed. Replacement is your only remedy and ATCO's only liability. ATCO shall not be responsible for any losses of any kind associated with the use of this product or any damages of any kind resulting from its use. (Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.) This warranty gives you specific rights, and you may also have other rights which vary from state to state.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use only the application method specified for a particular use. **Woodlast 2** requires no dilution before use. Use as received following label directions. It is intended for wood products that usually require painting or stenciling, such as millwork and the like or in special situations to treat lumber for long storage in the open or in ground contact by simple non pressure method.

COVERAGE: One gallon covers 100-300 sq. ft. depending upon the wood species, porosity of wood and method of application. Stir or shake well before use. Products formulated or repackaged from this product must be labeled for "External Use Only", and must bear all the statements listed under the section entitled Precautionary Statements and the formulator(s) or repackager(s) telephone number.

RECOMMENDED USES:

Windows, window frames, doors, stairs, porches, siding, shingles, steps, fence pickets and rails, and beverage cases. Powder post beetles which invade structural lumber are killed by application of this preservative. These insects will not attack the treated wood. **Woodlast 2** may also be used on fence posts, poles, foundation sills, decks, boats and all exterior wood exposed to moisture or weather. Pretreatment only. Do Not apply at sites on or near water or wetlands. Since **Woodlast 2** has very low phytotoxicity it can be used to treat wood for greenhouses, nursery flats, etc. In addition to preventing decay, blue stain, and insect attack on wood, **Woodlast 2** controls warping, swelling, shrinking and end checking caused by changes in moisture content of lumber and plywood products. Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with **Woodlast 2**. Wood treated with **Woodlast 2** should not be used where it may come in contact with food, feed or potable water. See Technical Bulletins for additional uses.

FOR TREATMENT BY DIP, ROLLER, BRUSH, AND SPRAYING

Above Ground Contact: The best results will be obtained if wood to be treated is immersed for 3 minutes or longer. If dipping is not possible, 2 brush coats, roller, or spray applications should be applied. Allow at least 1 hour between applications. Make certain all areas are fully treated to get the maximum benefits. Allow 24 hours or longer after application of the preservative prior to painting. **Ground Contact:** Seasoned or green wood may be treated. Make certain the wood is free of bark, then immerse in **Woodlast 2** for 12 to 48 hours or until the sapwood is completely penetrated. Water repellents may be admixed with Cunapsol-1 to improve dimensional stability of the treated wood. Colorants may be admixed for aesthetics and additional UV protection.

This product is compatible and may be colored by the universal machine colorants employed to color oil or water based paints. Note that colorants weather differently, and that color development varies with species, grain and wood undertone.

I certify that this label is identical to the label placed on the pesticide containers for SHACELAST
EPA Reg. No: 6022-S18-3486 which

- ☐ Is being held for distribution or sale this date.
- ☐ Is being held in a bulk storage tank.
- ☐ Was repackaged into a bulk tank and sold on _____
- ☒ Has been used since 6/2006

Date: 9/24/08 Inspector Initials: CS

Firm Official: [Signature]

PRECAUTIONARY STATEMENTS:

Hazards to Humans and Domestic Animals. **CAUTION.** Harmful if swallowed. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Do not take internally. Avoid breathing of vapors. Use in a well ventilated area. Vapors may cause injury if adequate ventilation is not insured. Wash thoroughly with soap and water after handling. Close container after each use. Keep preservative and freshly treated wood away from flame, foodstuffs, and plants. Do not use this product in any confined area where vapors may concentrate and cause injury to plant or animal life.

FIRST AID: If swallowed, call a doctor or get medical attention. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Avoid alcohol. Call your poison control center, hospital emergency room, or physician immediately.

IF IN EYES: Flush with plenty of water. Call a physician if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. For terrestrial uses. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL AND CHEMICAL HAZARDS

Do not use or store near heat or open flame

STORAGE AND DISPOSAL:

DO NOT STORE UNUSED PRODUCT INSIDE THE HOME. Rags, steel wool, and any other waste product may spontaneously catch fire if improperly discarded or stored. To avoid a spontaneous combustion fire, immediately after use, place rags, steel wool, or waste in a sealed, water-filled, metal container.

CONTAINER DISPOSAL: DO NOT reuse empty container. Place the lid securely on empty container and discard in trash. If the container(s) cannot be disposed of according to label instructions, consult federal, state, or local disposal authorities for alternate procedures.

RECOMMENDED USES:

This water-repellent wood preservative is a ready-to-use solution for unfinished wood and wood products...millwork, fences, siding, decks, shingles, outdoor furniture, structural lumber and many others. Apply by spraying, brushing, soaking, pressure treating, dipping, or rolling. When spraying, use a coarse wet spray to minimize over spraying. All surfaces must be bare for the preservative to penetrate. For below grade, use **Woodlast2** for lasting protection. **CONTROLS ROT-STAIN MOLD:** Contains copper 8 quinolinolate which controls rot-producing fungi on exterior, above-ground wood. Use before painting on new wood to give penetrating protection to wood fibers not normally reached by surface coatings. **INHIBITS ATTACK BY TERMITES:** Termites can seriously damage wood used in building construction. This product provides penetrating protection through soaking, brush, or flood spray application. **CONTROLS WARPING AND SWELLING:** Under ordinary conditions of exposure, wood to which this preservative has been applied will not pick up noticeable amounts of moisture. Thus, wood so treated has dimensional stability and the possibility of warping, swelling, or shrinking in service is greatly reduced. Excellent for all wood types including pressure treated. **PAINTABLE:** An excellent underseal to provide moisture barrier for paint protection. May be painted with all oil based paints and latex type paints. If topcoat is not applied over **1420 Woodlast**, the wood surface will be allowed to weather naturally to a silvery gray color.

DIRECTIONS FOR USE:

is a violation of Federal law to use this product in a manner inconsistent with its labeling. **IMPORTANT:** Do not open can without reading instructions.

Exceeds N.W.W.D.A & Fed. Spec. TT-W-572 for water repellency
CONTENT FIVE GALLONS/18.93 LITERS

STIR THOROUGHLY BEFORE USING

ATTENTION: Surfaces may become slippery when wet. Use caution when walking on surface when moisture is present. Apply in sections so wet material does not have to be walked on during application.

PREPARATION: Clean and hose off all dirt, grease, and oil with mild detergent. Scrub well to remove deposits. Avoid high pressure cleaning which may harm wood; remove mildew with an EPA registered mildew stain remover or with one part bleach and three parts water. For previously painted, stained, or clear sealed wood, strip entire surface by sanding or with chemical stripper to the bare wood. For deteriorated latex or oil-based finishes, use a cack finish remover. It is recommended that a dust mask, eye and apparel protection be worn when using a sander. Before application, clean with a brightener/cleaner/conditioner to open the wood grain and rejuvenate the natural color of the wood. Bare wood surfaces must be completely dry before applying this product. All wood cutting should be completed before product application. Wood must be clean, dry and free from previous finishes. When applying, avoid grass, shrubs, trees, and other plant life. When thoroughly dry, treated wood is secure for use with plant life.

APPLICATION AND COVERAGE: Use in a well ventilated area. Wear a NIOSH/MSHA approved mist/vapor respirator when spraying or for continued, prolonged, or frequent use of this product. Apply by spraying, brushing, rolling, soaking, pressure treating, or dipping. Pressure treating or extended soaking is the most effective application method where deep penetration and high absorption are needed. A soaking period of 5 minutes per inch of wood thickness is recommended. Joints and exposed end grains of wood are more absorbent than flat or edge grain surfaces. Coverage varies by species and condition of wood. Expect 150 to 200 sq. ft. per gallon for spray, brush, and rolling application and 5 to 10 gallons per thousand board feet for soaking, dipping, and pressure treating. **DRY TIME:** Allow to dry a minimum of 48 hours prior to topcoating with an oil-based paint. Allow up to 30 days of drying and weathering prior to topcoating with a latex-based paint. **CLEAN UP:** Clean brushes and other tools with paint thinner or mineral spirits. Remove drips and spatters while product is still wet. If dried, use paint remover.

WARRANTY

Proper application is critical to the effectiveness of the product; however, when applied and used according to this label, this product is capable of protecting wood under the conditions described above. The performance of the treatment will be affected by the condition of the wood when treated, the species of wood, the type of exposure, and previous and subsequent treatments. Read the label before use, comply with all directions, and use common sense in handling. If you open this container and find that the product does not conform to the specifications on the label or in our catalog, you may return it within twenty days of purchase to American Tar Company (ATCO). ATCO will promptly replace it without charge. This is in lieu of all other warranties, either express, implied, and statutory, and except for this warranty, all express, implied, and statutory warranties (including the implied warranties of merchantability and fitness for a particular purpose) are hereby disclaimed. Replacement is your only remedy and ATCO's only liability. ATCO shall not be responsible for any losses of any kind associated with the use of this product or any damages of any kind resulting from its use. (Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.) This warranty gives you specific rights, and you may also have other rights which vary from state to state.
